AKSHAY KANADE

Software Engineer

✉ kanade.ak05@gmail.com

📞 7020070301

📍 Pune, Maharashtra

Skills

Languages: Core Java, Java 8, SQL.
Technologies: J2SE, J2EE, JDBC,REST Web Services.
Frameworks: Spring (Core, Boot, Data JPA, JDBC).
Testing: JUnit, Mockito, Postman.
Application Server: Apache Tomcat.
Database: MySQL.
Operating Systems: Windows.
Version Controls: Git, BitBucket.
Build Tool: Maven Development.
Tool: Eclipse, IntelliJ Idea Project.
Management Tool: Jira.
Methodologies: Agile.

Technical Expertise

Expertise in: Java (core, Java 8), Spring (boot, core, Data JPA, JDBC), MySQL, Restful Webservices, Postman.

Fair Skills: Junit, Mockito, Sonar Cube, Microservices, GIT, Jira, Agile Methodology, AWS(EC2,S3,).

Education

Bachelor of Engineering,
BAM University, Sambhaji Nagar
(Aurangabad), Maharashtra

OBJECTIVE

Striving for a Quality Assurance position to apply my skills effectively within a collaborative team environment, while staying attuned to the latest advancements in Information Technology. Committed to upholding excellence and adapting to evolving industry standards.

PROFESSIONAL SUMMARY

- Dedicated Software Developer with 4+ years of experience.
- Proficient in JAVA/J2EE technologies including **Spring Core, Spring Boot, JPA, MVC and Restful Services**.
- Implemented various **design patterns** like **Singleton ,Factory** and Strategy .
- Experienced in implementing **Micro-Services** and design patterns such as Circuit Breaker, API Gateway, Service Registry.
- Extensive experience with **Java 8** features.
- Strengthened application security by integrating **JWT** protocols.
- Knowledge of **Hibernate**.
- Hands-on experience with **MySQL Database.**
- Proficient in implementing Web Services and handling request or response using **Restful Web Services**. Designed and documented REST APIs using **Swagger**.
- Knowledge of **CI/CD** processes with **Jenkins.**
- Experienced in using various tools like **Postman**, **Swagger** and knowledge about **Docker** and **Zipkin** servers.
- Demonstrated experience in Agile project methodologies, collaborating with cross-functional teams, and ensured technical and functional specifications alignment.
- Proficient in **Jira**, **Git**, Maven and experienced in unit testing using **Junit & Mockito.**
- Excellent interpersonal skills, outstanding problem-solving, and decision-making abilities. Enthusiastic learner, quickly grasping concepts and technical skills.

PROFESSIONAL EXPERIENCE

- Working as a Software Engineer at SVARROS TECHNOLOGY from Jan-2024 to till date.

- Worked as a Software Engineer at JB Chemicals from Dec-2022 to Dec-2023.

- Worked at Glenmark Pharmaceuticals from Nov-2018 to Dec-2022

Langauges

- English

- Hindi

- Marathi

PROJECT : 3

Client - Cadent Gas

Description - Cadent Gas is the largest gas distribution network in the UK. It is responsible for managing and maintaining the extensive pipeline system that delivers gas to millions of homes & businesses.

Roles & Responsibilities:

• Developed RestAPIs using Spring Boot, established connections with MySQL & incorporated all layers for seamless integration.

• Implemented features to calculate a total cost of fuel order based on current fuel price & different current fuel taxes for various fuels.

• Collaborated closely with stakeholders to gather requirements & ensure alignment with business needs.

• Developed RESTful APIs using Spring Boot, Spring, Java 8, ensuring efficient & reliable web services.

• Successfully implemented & integrated various microservices, enhancing system scalability & flexibility.

• Conducted unit testing to maintain code quality & functionality, log analysis, and API documentation using Swagger for high-quality deliverables.

• Actively participated in code reviews, test result evaluations, & documentation tasks.

• Collaborated within an agile methodology framework, engaging in estimation, planning, design, & development phases.

• Engaged in daily meetings & various project-related discussions, ensuring effective communication & alignment..

****

Client : Amzor Healthcare

Description : Amzor Healthcare is a pioneering healthcare provider known for its advanced medical technologies & patient-centered approach..

Roles and Responsibility:

- Developed classes & logic for web application.

- promptly resolved bugs to uphold code quality.

- Implemented mainly core Java concepts such as Oops, Collection Frameworks & Exception Handling.

****

Client: Carson Air

Description: Carson Air, a client in the airline domain, offers specialized services including medical evacuations and time sensitive cargo deliveries.

Roles and Responsibilities:

- Involved Rest API with Spring boot and connect with MySQL.

- Delivered the code raising PR in GitHub

- Build RestAPI Endpoints with all layer using Spring Boot.
