RAJENDRA LOKHANDE

9272129044 | rajendralokhande200@gmail.com | Pune

PROFILE SUMMARY

- 4+ years of extensive experience define me to produce good attitude as well as better understanding of Java toperform new development as well as quick troubleshooting of existing bugs or defects.
- Good experience in developing application using **JAVA/J2EE** technologies like **Java, JDBC, Spring Core, SpringMVC, Spring Boot, Spring Data JPA, Restful Services**, and **Micro Services.**
- Experienced in applying **SOLID** principles to enhance code maintainability and flexibility.
- Experienced in utilizing **Java 8's** wide range of features.
- Strong foundation in **Collection**, **OOPs**, and **Exception Handling**.
- Hands-on experience in managing **MySQL** databases.
- Hands On experience on **ACID transaction management** principles.
- Hand on experience on **designing, development, testing, troubleshooting** and **debugging** of the application.
- Implemented Web Service using **Restful web Services**
- Using **JSON** for handling request and response for Restful Services.
- Working experience with **Jira, Git.**
- Familiar with **Agile Methodology**.
- Knowledge of **Junit** and **Mockito**.
- Keen understanding of design patterns like **Singleton, Strategy, Factory**.
- Proficiently Utilized Tools such **as Postman, Swagger** through Practical Hands-on Experience.
- Understanding of **Functional and Technical** specification
- Proficient with IDE like **IntelliJ IDEA**, **Eclips.**
- Eager Learner with a Rapid Aptitude for Grasping Concepts and Technical Proficiencies.

TECHNICAL SKILL

Languages	– **Java, Java 8, SQL**
Frameworks	- **Spring, Spring MVC, Spring Boot, Data JPA, JDBC**
ORM-Tool	– **Hibernate**
RDBMS	- **MySQL**
IDE	- **IntelliJ Idea, Eclips, STS**
Rest API testing tool	- **Postman**
Version Control	– **GIT**

EXPERTISE

- Java & Java 8
- Spring boot
- Data JPA
- Git

FAIR SKILL

- MySQL
- Jira
- Junit & Mockito

WORK EXPERIENCE

• Working with Advanced Infoscan Pvt Ltd as a Software Engineer from Nov-2023 to Oct 2024.

• Working with Tata AIA from April 2021 to Oct -2023.

• Working with Bajaj Allianz from Jan 2019 to Nov-2020.

EDUCATION

Completed **B.E.** from Savitribai Phule, Pune University.

PROJECT DETAILS

CLIENT: Expeditors

Description: Expeditors is a global logistics company headquartered in Seattle, Washington. The Company employs trained professionals in over 350 locations located in more than 100 countries, linked into a seamless worldwide network through an integrated information management system.

Role and Responsibilities

- Played a role in gathering project requirements, analyzing design needs, and handling development.
- Worked on the development of RESTful APIs, demonstrating proficiency in creating efficient and reliable web services using Spring Boot, Spring, Java 8 and Java.
- Involved in the implementation of diverse microservices, playing a key role in employing various design patterns to architect efficient, scalable solutions.
- Implemented core java concepts like Object Oriented Programming Concepts, collection framework
- Used Java 8 concepts like stream API, Optional class, lambda expression to make the code compact and enhance performance.
- Involved in bug fixing.
- Wrote comprehensive unit tests using Junit resulting in improved code quality and reliability.
- Implemented Spring Validation to enhance input validation and data integrity Used Entity, Repository, DAO, DTO to handle the fetched data from Database.
- Prepared API documentation using Swagger.
- Active participation in daily stand-up meetings (Scrum) and requirement review meeting collaborating with the team to analyze requirement and provide technical insights.

CLIENT: Aviva Canada

Description: Aviva Canada is one of the leading property and casualty insurance groups in the country, providing home, automobile, lifestyle, and business insurance to 2.5 million customers. As a subsidiary of UK-based Aviva plc, Aviva Canada has more than 4,000 employees focused on creating a sustainable future for our people, our customers, our communities and our planet. In 2021, Aviva plc announced Aviva's global ambition to become a net zero carbon emissions company by 2040.

Role and Responsibilities

- Developed classes and logic for web application.
- Worked on applying SOLID principles, leading to improved code maintainability and adaptability.
- Incorporated fundamental Java concepts like Object-Oriented Programming (OOPs) principles, collection frameworks, and strong exception handling into the core of project implementation.
- Mainly involved in Developing Service layer for writing business logic according to client requirement
- Used Java 8 to create clever and advanced features that enhance the project's abilities
- Involved in implementing persistence logic using Hibernate.
- Involved in testing of classes
- Implement core java in project.
- Active participation in daily stand-up meetings (Scrum) and requirement review meetings, collaborating with the team to analyze requirements and provide technical insights
- Used Entity, Repository, DAO, DTO to handle the fetched data from Database.
- Prepared API documentation using Swagger.

CLIENT: Vellore Energy

Description: Vellore Energy Technologist Company Private Limited (VETCPL) is a Private Limited Indian Non-Government Company incorporated in India on 17 December 2007 and has a history of 16 years and six months. Its registered office is in Vellore, Tamil Nadu, India.

Role and Responsibilities

- Worked on integrating core java concept like OOPs principles, collection, Exception handling into the project foundation.
- Fixing the bugs.
- Implementing business logic (service layer).
- Mostly involved in support
- Worked on code integration
- Helping senior in code enhancement
